

Paulina Alarcón

Full Stack Developer

Córdoba, Argentina
+54 9 3517662167
alarconayelenpaulina@gmail.com

SKILLS

- Problem solving
- Analytical thinking
- Teamwork
- Effective communication
- Adaptability
- Commitment & autonomy

TECHNOLOGIES

Languages: JavaScript, TypeScript, Dart, SQL, Java

Backend: Node.js, Express, NestJS, REST APIs, TypeORM, Sequelize, MySQL, PostgreSQL, Redis

Frontend: React, Vite, Flutter, Material-UI, TailwindCSS, Zustand, TanStack Query

Architecture: Hexagonal (Ports & Adapters), DDD, Microservices, OpenAPI, Monorepo (Nx)

Auth & Security: Auth0, WorkOS, OAuth2, JWT, RBAC

Cloud & DevOps: Google Cloud Platform (Cloud Run, Storage, Secret Manager), CI/CD (GitHub Actions), Firebase

Testing: Jest, Vitest, React Testing Library, Playwright

AI & Productivity: AI-assisted development (Claude Code, GitHub Copilot)

Methodologies: Scrum / Agile

LANGUAGES

Spanish — Native
English — C2 Proficient

PROFILE

Full Stack Developer with 3+ years of experience building production fintech systems end to end — from Flutter mobile apps to Node.js/NestJS backends, internal operations dashboards, payment integrations and multi-tenant APIs. Strong focus on backend engineering, clean architecture (Hexagonal / DDD), secure API integration and cloud deployment (GCP). Comfortable across the full stack with React/TypeScript and modern tooling.

EMPLOYMENT HISTORY

- Finnix.ai — Full Stack Developer** Apr. 23 – Present
- Develop and maintain a customer-facing mobile app (Flutter), ensuring secure integration with internal and external APIs.
 - Build backend services in Node.js/Express and contribute to a new NestJS core-banking platform designed with Hexagonal Architecture and DDD, on MySQL/TypeORM and Redis.
 - Develop internal operations dashboards (React + Material-UI) with Auth0 role-based access control: device management, credit operations, payments and compliance workflows.
 - Integrate payment flows (cash-in gateway / OXXO references) and third-party services for identity verification (Nubarium OCR, INE) and credit bureau data.
 - Build and integrate multi-tenant partner APIs secured with Auth0/OAuth2 (M2M) and deployed on Google Cloud Platform (Cloud Run + API Gateway), exposing credit-origination endpoints.
 - Implement credit-decisioning rules and customer-status flows (approvals, blacklist, write-off handling).
- Potentiia — Full Stack Developer** Mar. 25 – Present
- Develop an enterprise React/TypeScript platform organized as an Nx monorepo (multiple apps + shared packages) for program/cohort management and customer analytics.
 - Implement a Ports & Adapters (Hexagonal) frontend architecture enabling vendor-independent integrations (analytics, auth, observability), swappable via configuration.
 - Build type-safe API integration using OpenAPI code generation, with TanStack Query and Zustand for state management, and forms with React Hook Form + Zod.
 - Implement multi-tenant features with subscription-based entitlements and feature gating, enterprise SSO (WorkOS) and internationalization (i18n).
 - Ensure quality with a full testing pyramid (Vitest, React Testing Library, Playwright e2e + accessibility) and observability (Sentry, GCP Cloud Trace).
 - Deploy to Google Cloud Platform with Secret Manager and Workload Identity Federation via GitHub Actions.

ACADEMIC PROJECTS

- **Henry Bootcamp (2022–2023)** — A video-games catalog SPA and a "wine club" e-commerce: React/Redux front ends with Express + PostgreSQL/Sequelize back ends, including authentication (Auth0), payments (PayPal) and external-API integrations. Deployed on Railway/Vercel.

EDUCATION

- **Full Stack Web Developer** — Henry Bootcamp (Jun. 22 – Mar. 23, 700 hrs)
- **English Translation** — National University of Córdoba (Feb. 17 – Not concluded, 1st–2nd year passed)
- **Introduction to Programming in Java** — UTN (2021, 150 hrs)
- **Spring Boot from Scratch** — Udemy (2022)
